Opis

The first time the application was launched, a form appeared with available fields:

- Username
- Password
- Confirm password

Where a validation message did not appear with the required **Confirm password** field.

List of steps for reproduction:

- Opening the MrBuggy 7 application
- We click the "Save" button

Actual result:

The validation message "This field is required" did not appear next to the **Confirm password** field.

Expected behavior:

A validation message also appears next to the **Confirm password** field in case the user fails to complete the field with "This field is required".

Attachment:

Creating the first admin

The username must contain a minimum of 5 characters and a maximum of 20 characters.

The password must have at least one special character (!@#\$%?.) and number and must contain a minimum of 6 characters and a maximum of 20 characters.

* Username

This field is required.

* Password

This field is required.

* Confirm password
